

I would like to strongly urge the FCC to REJECT the NAB's petition 04-160. This country is about free enterprise and freedom of speech. If XM radio provides a great service, that actually exceeds FM and AM programming, that is not illegal, it is entrepreneurial. Competition and free enterprise make this country stronger. I will continue to subscribe to XM BECAUSE they offer less advertising, 24hr traffic and weather (instead of waiting for periodic updates) and an overall great product. I rely heavily on their traffic and weather updates. There is simply no argument that supports the NAB position, that would equate to the TV Weather Channel not being able to provide local updates because it might upset the local TV stations. Obviously a ridiculous argument. If FM and AM cannot compete, perhaps they need to reexamine their product, not legislate their competitors out of existence.
